

ERAC 1212/17

**NOTE**

---

From: General Secretariat of the Council  
To: Delegations  
Subject: ERAC Work Programme 2018-2019

---

Delegations will find annexed to this Note the ERAC Work Programme 2018-2019, as adopted by ERAC at the plenary on 5 December 2017.

---

## **ERAC Work Programme 2018-2019**

### **Introduction**

The work programme will cover the next period of policy development in the areas of research and innovation and closely related policies.

In 2018, the European Research Area advisory structure will be due for a review of its structures and processes. Following the latest review in 2015, it was decided that ERAC would move into a new phase of activity, focussing on more strategic issues, with timely, open debates that are better aligned to the incoming Presidency's priorities, and with clear deliverables that can add value to the challenges facing EU and national research and innovation systems. This proposal for the ERAC Work programme 2018-2019 has been prepared with this background in mind.

### **Working methods for ERAC**

Article 2 of ERAC's mandate states that: "The Committee's principal mission is to provide timely strategic input to the Council, the Commission and Member States on the ongoing implementation of the ERA in Member States and Associated Countries and on other strategic research and innovation policy issues. The Committee shall do this on its own initiative or at the request of the Council or the Commission."

ERAC's work programme will continue to take a flexible, proactive approach to ensure ERAC can contribute in a speedy and timely manner, as appropriate, to emerging and evolving issues. ERAC will consider three or four 'big ticket' issues each year. Such topics will give ERAC an opportunity, for example:

- to give strategic advice at an early stage in developing R&I policy;
- to consider the impact of other policies on the R&I agenda, the impact of R&I policy on other policies, and advise on the appropriate actions; and
- to advise on the implementation of R&I policies and propose specific actions to support these policies.

It is important that ERAC considers carefully what outcomes and impacts it hopes to achieve. ERAC is reminded that it does not have to reach consensus on topics and outside speakers may be invited to stimulate discussions. It is proposed that Directors-General are strongly encouraged to attend the strategic discussions.

ERAC will improve the dialogue with the incoming Presidencies, undertaking the necessary preparatory work to contribute policy options for debates in Council. Presidencies will be invited to present their indicative priorities and planning to ERAC well in advance of their term. ERAC will also liaise with the current/outgoing Presidency to provide advice regarding the follow-up and implementation of Council conclusions.

ERAC will continue to work on its 'regular' strands, in particular the follow-up and monitoring of the implementation of the ERA National Action Plans, to achieve the objective of implementation by 2020, as set out in the ERA Roadmap and the National Action Plans. In addition, ERAC will work on ensuring the momentum is maintained on the initiatives to deliver tangible results.

Prioritisation and willingness to actively participate in the process, from both Commission and Member State representatives, will be the key factors in meeting the demands during this period.

The quality in preparations for each strategic debate is decisive. ERAC and the Steering Board will have to make use of seminars, *ad hoc* working groups and rapporteurs so that the issues at stake can reach the Plenary sufficiently mature for debate and/or adoption, e.g. in the form of a written opinion.

To have adequate time for strategic debate in ERAC Plenary, summary information will continue to be given to members of ERAC in writing in advance of the meetings (under Standing Information Points), with new important developments being taken up orally by the co-Chairs or Presidency. Furthermore, input from the ERA-related groups on their recent activities will be given to ERAC members in writing prior to the meetings.

## Strategic topics for 2018-19

The proposed strategic topics for consideration by ERAC in 2018-19 are:

- The Innovation/Research divide (both within the EU and with the rest of the world);
- Digitalisation in the context of the societal challenges;
- Open innovation, acceleration of knowledge transfer and access to research results
- European Open Science Cloud, Open Science and Open Access
- European Innovation Council;
- Foresight (e.g. The Knowledge Future: intelligent policy choices for Europe 2050).
- ERA Governance Review
- National structural reforms (linked to EU semester and the contribution that PSF can make)

## **Presidency's priorities**

This particular part of the work programme will develop in line with the priorities for the Presidencies as they become more mature.

- Accelerating the transfer of knowledge, data and research results in support of a new generation of innovators and researchers (BG);
- Council Conclusions on ERA (AT)

## Regular strands

These strands include:

- ERA - implementation and monitoring the ERA Roadmap, including Member States' ERA National Action Plans and strategies; interim review of the implementation of the ERA National Action Plans which will also feed into the ERA Progress Report 2018; discussion on the future orientation and development of ERA in line with the Council conclusions of May 2015 that states that the ERA Roadmap and thereby the National Action Plans are seen as living documents, implementation of the Council conclusions of December 2015 on advancing gender equality in the ERA;
- Follow-up of the work of the ERAC Ad-hoc Working Group on partnerships in the context of ERAC's role in the Interim Evaluation of H2020 and contribution to preparations for the next FP
- Responsible group for overseeing Priority 1 “Effective national research systems”, through workshops, ad hoc working groups as well as debate with invited speakers
- European Semester – Annual Growth survey priorities for the Semester; dialogue on the R&I elements of the country reports and follow-up on R&I country-specific recommendations;
- Horizon 2020 Policy Support Facility - demand-driven, Horizon 2020 instrument that responds to requests made by Member States and Associated Countries for its three main services: Peer Reviews of national R&I systems; specific support to the design, implementation and evaluation of policy reforms; and mutual learning exercises;
- ERA governance - implementation of Council conclusions, including the coordination of ERAC and the ERA-related groups through the ERAC Steering Board with the objective of knowledge sharing and greater alignment of activities; streamlining ERA-related groups and other expert groups; preparing the annual report to the Council on the progress and impact against the ERA Roadmap to ensure that the Council is regularly and comprehensively sighted on progress.
