During the event speakers from across Europe will discuss the role of competitive research funding in science from several different angles. The event will provide a platform for the open exchange of ideas and the consideration of several questions, including: How does competitive research funding affect research institutions? What are the key factors to consider when designing, implementing, and evaluating a competitive research grant program? And does competitive funding help to develop and support Europe's research talent in full, or does it perpetuate the participation gap?
